Serving Industry Since 1915.

Get the Chatham Steel Edge

When your project requires stock or processed metal products, Chatham Steel Corporation is ready with the expertise, technology, inventory and service to make everything run smoothly from procurement through delivery. We have been serving our customers with a dedication to excellence since 1915 and are a leader in providing top quality products and processing to a broad range of industries. From our extensive product inventories to our ability to provide customized processing, we back our customers with a foundation of strength.

State-of-the-art technology

Chatham Steel continually invests in facilities, products, state-of-the-art processing equipment and information systems. In the hands of our skilled and innovative team, these tools and resources allow us to meet your job's specifications with accuracy and timeliness.

Extensive inventory

We maintain an extensive inventory with immediate access to a very wide range of products and grades. Structural products in our inventory include beams (4" to 36"), channels (3" to 18"), and angles (up to 8"), as well as structural pipe and tubing. And, because of our large inventory and processing capabilities, we help many of our customers reduce their cost of operations by processing and delivering products as they need them.

Industry expertise

More than 3,000 customers count on us to meet their needs with an unparalleled level of expertise and reliability. We provide high quality products and services to a wide variety of markets, including structural and miscellaneous fabrication, manufacturing, maintenance and repair, transportation equipment, and more.

Structural processing

- Cut-to-length, with precision band sawing to meet the most critical time frames
- Mitre cutting to the closest tolerances
- Beam splitting and straightening to meet your Tee requirement
- Punching for speed of structural fabrication
- Drilling to precision tolerance
- Markings for location of attachments and lifting guides
- Shape-cutting beams for ducting
- Cambering

Plate and Sheet processing

- CNC burning systems with capabilities that cover plate up to 14" thick, in widths up to 12' and lengths up to 54'
- CNC contour and straight bevel cutting
- Forming/press brake bending on carbon steel plate ½" thick to 12' wide
- Drilling to your specifications
- CNC machining, HAAS VF9 and VF4, Quickmill Gantry Machining Center for close tolerance milling and drilling

Bar, Pipe & Tubing processing

- Cut-to-length
- Mitre cutting
- Punching
- Drilling
- Rolling
- Slots
